

INNOWALK PRO

The motorised full-body exercise trainer

The “Innowalk Pro” enables motorised full-body exercise training in an upright position, similar to a crosstrainer, for patients with significantly reduced independent standing and walking abilities.

Where to use the Innowalk Pro?

The Innowalk Pro has been proven to be an effective end-effector device used in rehabilitation centres, clinics, therapy facilities and schools.

Who is the Innowalk Pro intended for?

The Innowalk Pro is suitable for children, adolescents and adults with moderate to severe motor impairment due to a neurological or neuromuscular condition.

Advantages

- Optimal utilisation of therapy time: Short setup time of approximately 5 minutes
- High training intensity: approximately 2000 steps per session
- Optimal positioning: Individual adaptation in accordance to size and function
- Limited strain on therapists: Motor assisted movement
- Space-saving: Small footprint: < 2m²
- Flexible training intensity: Positioning from sitting to standing, speed adjustable
- Can be combined with other therapies

Features

Swivel seat and swing away leg supports

- Facilitates easy transfer
- Reduced setup time = more therapy time

Integrated transport wheels

- Enables easy transport
- Flexible treatment locations (e.g., patient rooms)

Adjustable arm handles

- Enables arm training in various positions
- More intensive full-body training

Electrically adjustable tilt function

- Eases head and upperbody position

Integrated Bluetooth interface
