

Innowalk Pro Demonstration

Space

We can demonstrate the Innowalk Pro in any setting, providing there is step-free wheelchair access, as well as a power supply. If hoisting facilities are needed, this should be considered.

Timing

We recommend allocating at least half a day for an Innowalk Pro demonstration. This allows time to learn about the product and its benefits, as well as try it yourself, and more importantly try it out with some of your clients. An example of timings would be:

12:00-13:30 - Demonstration of features and benefits including trying it out yourself (1hr30)

13:30-14:15 - Trial with client 1 (45mins)

14:15-15:00 - Trial with client 2 (45 mins)

We can extend this to a full day if required, to trial more clients.

Who to invite

Please ensure that clients invited meet the user size restrictions of the Innowalk Pro you are trialling. Your Made for Movement Product Specialist will help guide you with this.
