

Innowalk Pro Loan for Schools

What can we offer?

For schools who are interested in trying out Innowalk Pro following a demonstration day, we offer a short term loan of **4-6 weeks**, dependent on product availability.

Staff Training

We can train up to 6 staff members to set up and operate the Innowalk Pro for a loan. These staff should be therapy staff or highly skilled support staff.

Staff being trained are required to commit to:

- Adjustments Training (**1hr45min** with no pupils present)
 - Set up with the pupils they will work with (**45min** per pupil)
- Therapy staff should be present for all pupil set ups.*

Pupil Assessment

Made for Movement will assess up to **6 pupils** who can use the Innowalk Pro for the duration of the loan. We will document their personal settings so the staff can set it up for each use.

Equipment

One Innowalk Pro at a time can be loaned, so schools should consider which size is most appropriate, with consultation and support from the Made for Movement team.

Optimisation

After the initial training day, your Made for Movement Product Specialist will offer an optimisation session that can be used for troubleshooting, changes to pupil settings as needed, to ensure the loan is running smoothly. This is usually in person, but can be done virtually if required.

After the loan

Sharing of any case studies/objective findings you have discovered during your Innowalk Pro loan would be greatly appreciated

We understand that you may want to try different sizes of Innowalk Pro or assess further pupils. Your Made for Movement Product Specialist will assist with this wherever possible. We can also give advice on fundraising and provide support with any events/information needed.
